

**War Control IRC Chat...**

Warchilin66, Tuesday 21 July 2009 - 07:45:52

Hello All,

After reviewing information in the #synchronet and #bbs chat rooms, I have read some interesting information about the synchronet irc network. One of the main servers craps out about every 10 minutes. They are in the process of letting someone else take control of the services. So another change and channel registration will need to take place again.
