

**Urgent! - Regarding email addressing!**

Warchilin66, Tuesday 07 April 2009 - 03:10:45

Hello Everyone,

Due to the larger internet providers blocking TCP port 25 and other related spam issue's You must have an email address that accepts our mail server wich is cpugod.synchro.net on TCP port 25. Internet providers are cracking down. The XNova game require's email verification and it cannot connect to most email providers. The best way to tell if you have one of these providers it to try creating an account on [XNova Uni4](#). Chances are you will see this error message below:

One option is to get a FREE email account on <http://cpugod.synchro.net:81/newuser.ssjs> Once you register with Computer God!!! Your email address will be [yournick]@cpugod.synchro.net You can access your email by logging in and going to the webmail form on the Computer God!!! synchronet BBS portal.
